L'AZIENDA

Nel 1964 nasce Alpen, grazie all'iniziativa imprenditoriale dei Fratelli Gianola, specializzati nella produzione di forbici e articoli per manicure.

L'azienda viene fondata a Premana, piccolo paese incastonato nelle Prealpi lombarde, forte di una lunga tradizione di eccellenze artigiane nel campo della produzione di forbici e lame.

Spinti dal desiderio di creare prodotti di altissima qualità e pregio i fratelli Gianola portano in poco tempo la loro azienda sul mercato italiano elevando i loro standard qualitativi a livelli sempre più alti ed affiancando alla produzione manuale anche l'utilizzo di macchinari che consentano di ottenere prodotti perfetti in ogni dettaglio.

L'ottimo equilibrio tra avanguardia tecnologica e cura artigiana porta in breve Alpen ad affacciarsi anche sui mercati internazionali, che riconoscono l'eccellenza dei prodotti, delle lavorazioni e dei materiali utilizzati.

Giunta alla seconda generazione con Mauro e Pietro Gianola, Alpen vanta un catalogo di più di 500 prodotti tra cui: forbici, set per manicure e pedicure, limette per unghie, pinzette e ferretti.

Tutti realizzati con la stessa cura e passione di quando l'azienda fu fondata, per continuare ad offrire ai propri clienti un prodotto italiano che fa della qualità e della durata nel tempo i propri punti di forza.

THE COMPANY

Alpen, funded in 1964, is the fruit of the will and entrepreneurial vision of the Gianola brothers, skilled and experienced craftsmen specialized in the production of scissors and manicure items.

The company is located in Premana, a small village in the mountains of Lombardy, which is world famous for its century old, high quality, production of scissors and blades. This manufacturing tradition is continued in our times thanks to the experience and know-how accumulated and passed on, through several generations of skilled craftsmen.

The founder's drive to create products of very high quality was rewarded very quickly by a rapidly expanding customer base on the Italian market; the Gianola brothers continued to higher their quality standards and optimized production cycles that encompass a great deal of handwork paired with the use of high-tech machineries, with the goal to obtain products that are perfect in every detail.

The perfect mix of craftsmanship and technology has allowed Alpen to attain quickly a solid reputation on the international markets, where customers appreciate the high quality of the products that substantiate itself in the careful selection of the best materials that through the workmanship of skilled craftsmen are turned into high quality and precious products.

In its second generation, with Mauro and Pietro Gianola, Alpen has broadened its range to more than 500 items, among which are scissors, manicure and pedicure sets, nail files, and tweezers. Every item is manufactured with the same passion and care for quality that characterize the company since its foundation. The goal is to offer its customers Italian products that feature quality and durability as key assets.
